-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

The requirement for species election is sent in response to Applicants Election of 06/29/2009.

Applicants have elected without traverse the invention of Group III, and withdrawn from examination the claims of the non-elected groups. Applicants have further made an election of a particular combination of genes. The pending claims of elected Group III require the species election with regard to the different species of gene expression modulating agents recited in the claims

Election/Restrictions

1. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

Applicants are required to select a single particular gene expression modulating agent from those agents recited in the claims as follows: TGF-beta signaling inhibitor (as recited in claim 28); TGF-beta II receptor inhibitor (as recited in claim 29); a selective estrogen receptor modulator (SERM), selective progesterone receptor modulator (SPRM), or mast cell inhibitor (as recited in claim 37); an agent that has a pyrazolopyridine scaffold, a pyrazole scaffold, an imadazpyridine scaffold, a triazole scaffold, a pyridopyrimidine scaffold, or an isothiazole scaffold (as recited in claim 40); a GnRh agonist or antagonist (as recited in claim 41); roloxifene; asoprisnil (J867);

Art Unit: 1634

RU486; SB-505124; SB-431542; tranilast; cystatin C (CystC); SD-208; LY550410; LY580276; pitavastatin; 1,-5 naphthyridine amiothiazole derivative; 1,5 naphthyridine pyrazole derivative or ursolic acid (as recited in claim 42).

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

2. The following claim(s) are generic with regard to any required gene expression modulating agent: claims 27, 31-36 and 56.

3. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: The different species are structurally and functionally distinct elements which do not share a common technical feature and thus do not possess a special technical feature.
